Get results with Total Customer Focus

Your company can increase sales, reduce costs, solve problems faster and become a trusted business partner for your customers by implementing these three fundamental shifts in the way you think about and interact with your customers.

Structure Program Main Topics

Shift 1:

From reactive to proactive

Proactivity is often an overused term, but the reality is that when dealing with a client request, the focus is still on response. Yet imagine how the relationships would change if your customer-facing person were to anticipate problems the customer is likely to have and address them before they occur. This first TCF™ skill, being proactive, has an extremely positive impact on the customer's perception of your company as a trusted business partner. Here we bring proactivity to life with very pragmatic tools!

Shift 2:

From technical problems to real needs

Customer-facing personnel frequently address visible technical problems only to discover later that your customer's real underlying problem has been left unresolved. Analysing the invisible part of the "iceberg", getting down to the "below the water line", results in better long-term management of customer problems. Here we dive!

Shift 3:

From the customer is "always right" to balanced outcomes

Collaborative outcomes that are both reasonable and doable are key to any mutually satisfying relationship. To achieve this, your customer-facing people must learn how to "push back" on some customer requests in order to set realistic expectations, while satisfying your customers at the same time. Here we learn how to "say NO" while making the customer happy!

Measuring Results

For Your participants, Your company and Your customers, an advanced training measurement process is deployed through the dedicated program App to assess:

ADOPTION: measure adoption of skills and behaviours before and after training

CAUSALITY: collect and analyze success stories that explain how the skills were applied

RETURNS: measure financial impact in terms of revenues, productivity, savings, and give-aways

Measurement is integrated into the flow of the program and results are used during the follow-up coaching sessions, and summarized in value adding personal and executive reports

Sample List of Clients in Previous Programs

- ADVANTEST
